Are Preparing to Give Their Leader Rousing Reception at Academy.

Montague stock pulled up yesterday as a result of the reopening of the Governor's campaign in Bedford on Monday, and in anticipation of the fine reception his friends are preparing to give him here in the Academy Saturday night.

The Governor returned yesterday morning and was with the State Board of Education during most of the day; he received a number of callers, however, who came to cheer him in his fight, and he and they appeared in fine spirits over the outlook.

The Governor speaks in Lynchburg to morrow night and elaborate arrangements are being made for his reception there. The Academy meeting here promises to eone of the striking features of his campaign. In this speech the Governor will reply to Senator Martin's speech in the same half.

### Bright's Disease And Diabetes News.

To the Church Women of the South.

It is so hard for people to believe that Bright's Disease and Diabetes are now curable that I am asked to permit references to my own case. There are too many dying to remain silent. I had both Bright's Disease and Diabetes for over five years. Was very feeble, had dropsy, and the physicians told us the case was hopeless. I heard that people were heing cured in this city and procured the treatment. In a few months the dropsy disappeared and in a year I was well. To show how well, will say that later I stoed a capital operation at the Waldeck Sanitarium in the presence of six physicians. Many friends, including Dr. Markell, of Cloverdale and Judge E. B. Cutler, of Pine Street, are fully cognizant of my recovery. In fact, Judge Cutler is himbelf in ow recovering under the same treatment. Let the cure be proclaimed to the world.

## HIGH SCHOOL ON OLD FORD SITE

TO CONSIDER IT FRIDAY

After Site and Cost Are Determined Plans to Come

Up.

The matter of constructing a splendid new High School building for Richmond is now one of the livest of local topics, and the latest turn taken is a strong disposition to secure if possible the entire block on which the Powhatan Hotel stands, for the site.

The subcommittee of the Finance Committee, named to report to the full committee as to a site and cost, will meet in Chairman Grundy's office in the Chamber of Commerce at 4 o'clock Friday afternoon to take the initial steps leading up to the work. This committee is composed of Chairman Grundy, and Mesers. Cannon, Cottrell, Dabney and Pollard. The possible, if not, indeed, probable, selection of the old Ford's Hotel block

purchase the site and make the building modern and complete in every respect.

The matter is now in better shape than ever before, and all elements seem to be puiling together in harmony.

The first questions to be determined are those relating to cost and site. These will have their origin in the subcommittee from the Finance Committee.

was preinfiment, that the Battintone pa-pers halled his stable as one of the great ones of the country. While Mr. Dunlop owns a few jumpers and park hacks, his especial fancy is the harness horse. At the recent show his stable took no less than fifteen ribbons—five blues, five reds, four yellows and a white, besides the great challenge cup offered for the best park four.

Then as to Plans.

If their recommendations go through the Council, then the matter of plans will come up for full and free discussion under the following resolution adopted Monday night:

"That this committee (Finance) meet in conference with the School board, Council committee and architects in executive session, and go into all matters regarding the selection of plans for a new High School building and all other matters thereto pertaining."

This does not preclude, but is rather a reconsideration of all the plans already submitted and passed upon, unless the Ford site should be decided upon, which would necessitate other plans, owing to the fact that the building, which would be there constructed would be entirely different from the one heretofore contemplated. lop's stables, and turns them out in good shape. Their success, however, is due in no small degree to the excellent manner in which they were handled by Mr. J. C. Mason, who drove all of Mr. Dunlop's entries. The Baltimore papers spoke in high terms of Mr. Mason, whose picture they also printed. It' was stated that he had been brought over from England in the terms of the consistence of the

It seems well understood that in the latter event the members of the Finance Committee will favor the Bryant and Blauvelt plans over all the rest, and the plans of the latter.

The question is creating a great deal of interest, and as is nearly all classes of people, talk on the subject is constantly heard. The harmony with which all the ele-ments are working is gratifying to the public, and it is believed this will result in an early and happy consummation

## TUBERCULOSIS A FEARFUL MENAGE

Richmond Academy of Medicine and Surgery Discuss Problem.

#### DR. GRINNAN'S ABLE PAPER

'Where the Sun Doesn't Go the Doctor Does"-More Breathing Space.

Tuberculosis was the subject under discussion at the Richmond Academy of Medicine and Surgery to-night. Dr. Edward McGuire, presid

sided, and Dr. Mark W. Peyser was sec retary.

The paper of the evening, read by Dr. St. George T. Grinnan, was "Tuberculo-sis in Children," Dr. Grinnan's statement of facts was such as to be of especial interest to every mother and father in ine city. The curse of tuberculosis, its treatment and its cure is of first importance to every citizen of the city. It is an ever advancing enemy to health and lite that only a combined resistance can hope to drive back, and it is this combined effort that the medical profession ask for. There is an old saying that God helps those who helps themselves, and the same might well read. "Physicians help those who help themselves," for the cure of tuberculosis is in the patients' own hands. ince to every citizen of the city.

Dr. Grinnan stated that in the schools Dr. Grinnan stated that in the schools of Paris 14 per cent, of the girls and 17 per cent, or the boys had tuberculosis, a speaking of the children born in America, he stated that those born of Irrica mothers were more subject to tuberculosis than any other race. French mothers come next, and then Scotch, while the Pollsh and Russian mothers bear children that show no trace of tuberculosis. The hat show no trace of tubercolosis. The children of American born mothers are less than one-half as susceptible to consump-tion than those born of Irish mothers Danger of Crawling.

One of the great dangers, he stated, to young children came with the crawling young children came with the crawling age, when the young child placed its hands in the dust on floors and dragged its clothes in the dirt. This is exceedingly dangerous, and he recommended that a clean sheet be placed on the floor and the child kept upon it. Dr. Grinnan, in speaking of the fatalities connected with houses in which consumptives had lived, told a story of a home in London. An entire family living in it died of tuberculosis. The next family that moved uberculosis. The next family that moved in, consisting of seven persons, all died of the disease. A third family of six, living in the house, all died, and four of the last family died from the same dis-

ense.
"It is almost impossible to disinfect a house in which consumptives have lived," said Dr. Grinnan. "I would remove the wall paper, whitewash the walls, paint the floors and all the wood work, be-

the floors and all the wood work, besides using disinfectants."

Continuing, he urged that in the rooms
used by consumptives, no brooms be allowed. The dust and dirt should be removed by dust cloths, dampened either
with water or oil.

In conclusion he gave the following sugrestions for relief:

gestions for relief;
1. Children should be allowed to cry n order to strengthen their lungs 2. They should have healthy and proper

3. They should be required to keep their teeth clean.4. They should have plenty of fresh

"There is an old saying," said Dr. Grin han, "'where the sun does not go, the doc tor does, and so I say that Richmond

tor does,' and so I say that Richmond needs more parks and more breathing space for the children."

Dr. Grinnan's very able address was warmly applauded.

In the discussion of the subject Drs. McGuire Newton, Clifton Miller, Ennion Williams, Gordon, Beadies, Tallaferro, Barksdale, Peyser and Edward McGuire spoke briefly. Dr. Edward McGuire said that he advised his patients never to rent a house in which a consumptive had lived. (Continuing, he said:

"I paid as high as \$12.00 for a pair of shoes made to order, on account of my left small toe being crooked (caused by tight shoes), but they never gave me the satisfaction I received from the pair of shoes you made specially for me some months ago, according to my mail order. They needed no breaking in,' they fitted perfectly from the moment I put them on. I walked a number of miles in them the first day I received them. I see you are now advertising Spring Styles; please send me your Catalog, as I shall want a new pair of shoes after a while."
